

The way to optimal use of space and customer satisfaction.

## Retail Floor Planning

Quant includes a user-friendly floor plan editor with advanced features for efficient sales space management and category management. Thanks to Quant, it is possible to effectively manage large sales networks even if the individual stores are not unified and each of them is original in its own way.

“

*“We currently use Quant for store space planning and planograms to maximize space efficiency in our stores. Thanks to Quant, this process is very easy because it offers a lot of analytical tools which will provide you with the necessary data in one place.”*

Lukáš Jagnešák / Head of Space Management

# Get acquainted with the benefits of Quant

## Best value for money

Quant includes a professional floor plan editor with many unique features focused on optimizing and planning sales areas, including reconstructions, at very affordable prices. As part of our practical pricing plans, we can offer a solution tailored to your needs, whether you are a small retailer, a multinational chain or a supplier.

## Unlimited number of users

The Quant Premium pricing plan does not limit the number of users of the system and thus it encourages everyone within your organization to participate in the space & category management process. You will never have to face the dilemma of whether it pays off to use the possibilities of space planning software for the price of purchasing a license for other users.

## Support for different fixture types

Quant supports various fixture types starting with classic shelving systems, through atypical gondolas, freezers, hanging systems, display on tables or pallets. The floor plan editor includes advanced organization of fixtures to the library for an easy reuse.

## Easy to use and deploy

An intuitive user interface, an extensive set of online manuals and tutorial videos, as well as direct user support guarantee that users will like Quant very quickly. The transition is handled well not only by new users or those who have previously drawn floor plans in Excel but also by users with many years of experience in creating floor plans in CAD tools. Quant has one of the best user satisfaction ratings within the Retail Management Software category at G2.

## Integrated solution

Quant Desktop allows you to solve not only macro space in the form of floor plan management but also micro space within one integrated, multi-user application thanks to the integrated creation of planograms. However, this is just the beginning. From Quant Desktop, you can easily publish current floor plans of your stores or reconstruction plans to Quant Web. Here, your stores, teams of technicians and teams performing store check can access them without the need to install anything.
